

CLIMATE ACTION CAMP

Kyyjärvi,
Finland

25-31.07.2022

Dear Friends,

We invite you to participate in the Nordic and Baltic international environmental camp. The Earth Defense and Revitalization Camp is part of Luonto-Liitto's one-week Climate Action Camp from 25th-27th July, which can be found [here](https://www.luontoliitto.fi/ilmastoleiri).

Registration is now open:

<http://www.luontoliitto.fi/ilmastoleiri>

We need to protect and revive nature. This will be an international intergenerational meeting of the environmental movement, with a program of discussions, workshops, panels, concrete conservation work, utopia planning, post-fossil living, ecological reconstruction, art, encounters and, of course, community camping!

In 1979, a number of environmental activists gathered in Koijärvi, Finland. They built a dam on the site with their own permission, with the aim of keeping the lake's water level at the desired level and preventing a project set out to drain the lake.

In 1982, Suomussalmi, Finland was declared an ecovillage, and they organized a large Nordic Earth Defense Camp with the extensive cooperation of the Environmental, Peace and Alternatives Movement.

Now, in 2022, a joint meeting of the Nordic and Baltic environmental movement will be held in Kyyjärvi to defend and revitalize nature. More information about the camp program can be found [here](#).

[Here](#) is the schedule in English.

Luonto-Liitto will organize a joint transport to Kyyjärvi on Friday at 13:00 from Jyväskylä. You can also get there conveniently by direct bus from Helsinki if you can't get to public transport. Also you can cycle to the camp with the Endangered Species Bike Rides from Vaasa or Jyväskylä.

WELCOME ABOARD!
